

To whom it may concern,

Everything was going against my business – the number of sales was going down dramatically and enquiries were not converting into sales. I was very much surprised to see that all happening suddenly, as everything was going quite well earlier and this started happening suddenly. I checked things and found some negative reviews were there on the first page of Google about my business. I was surprised to see them. I had no clue how to deal with them. Therefore, I searched on Google to get tricks, and I get an idea of online reputation management service.

In course of my search, I found the websites of various companies and talked to them as well. But, only one company impressed me and that was Ranking By SEO. I talked to Lalit Sharma, the founder and CEO of the company. He talked very impressively, assuring me to improve the situation soon. So, I decided to handover this big responsibility in the hands of Lalit. He did a tremendous job by taking the negative reviews to the third page of search results just in a couple of months. That again brought my derailed business on track.

For me, Lalit is a man of words, as he did what he promised me.

Lalit, you have done a great job for me. May God Keep You in Good Health So You can Save People Like Me!
